OBJECTIVE:

After my 10th class I had decided to precede my career with Computer technology and persuaded with Diploma in computer technology. After successful completion I had moved forward with bachelors of engineering in the same field. Currently I am fully focused in today's latest tools and technologies and ready to utilize my all leanings.

Education:

- Diploma holder in (Computer technology) from Babasaheb Gawde Institute of Technology (89.09%)
- Graduated in B.E (Bachelors of Engineering in computer tech) from New Horizon Institute of Technology & Management (8.21 CGPI)

Company : **DEVOMARK**

In Devomark, I got opportunity to work with development team .Here I had hands-on experiance in HTML,CSS and javaScript and with these skill set I managed to develop front end of website. I also came to know about work culture and latest tools and technologies that are currently indemand in market.

1. HTML/CSS:
- Develop and maintain cross-browser compatible HTML/CSS code.
- Implement responsive designs to ensure optimal user experience across different devices and screen sizes.
- Stay updated with the latest HTML/CSS trends and best practices.

2. JavaScript:
- Write efficient and reusable JavaScript code to add interactivity to webpages.
- Debug and troubleshoot JavaScript issues to ensure smooth functioning of web applications.

3. Python :
- Proficient in Python programming language, understanding of its core principles.
- Familiarity with front-end technologies like HTML, CSS, and JavaScript.
- Ability to collaborate effectively in a team environment and communicate technical concepts clearly.

4. React:
- Proficient in React, with understanding of React concepts.
- Ability to collaborate effectively in a team environment and communicate technical concepts clearly.

PROJECT:

- Fabric defect detection
  It is a software website which help people to detect defects in the fabrics.

- Blog website
  Created a Tech blog website by using Html,CSS and Bootstrap.
